

PURE-D®

The toilet seat with integrated odor extraction

MADE IN BELGIUM

DENCK®

The best days are
those with nothing to
worry about...

DENCK

At DENCK, our core activity is developing innovative and high-quality products. We invent, design and improve innovative products that are extensively tested before they're made available for purchase.

Our latest product is **PURE-D**, the toilet seat with integrated odor extraction that provides a pleasant and odorless toilet experience.

Thanks to the powerful and quiet fan, your toilet visit will be virtually odorless for yourself and any visitors after you. **PURE-D** ensures a flawless extraction of disturbing odors in order for you to leave the smallest room with your head held high.

PURE-D®

Everyone has an odor,
but that doesn't mean
you should be able to
smell it

Unique patented ventilation system

Odor detection

Universal fit (D-Shape)

Integrated and rechargeable Battery Pack

Automatic start - stop

Easy to install and maintain

No chemicals and other harmful substances

Soft Close and Quick Release

Durable, antibacterial and scratch-free (Duroplast)

Replaceable filter

Unique patented ventilation system

Thanks to the powerful air circulation in the toilet, which is generated by a low-noise fan, your toilet visit will be virtually odorless for yourself and for any visitors after you. PURE-D ensures flawless extraction of unpleasant odors so that you can leave the smallest room with your head held high.

Odor detection

The PURE-D has a build-in smart odor sensor. If you often sit on the toilet for longer periods of time, the system saves energy by limiting the power of the fan. If necessary, the odor sensor reacts immediately and switches the fan back to standard power so that you can count on a flawless extraction and filtering of unpleasant odors.

Universal fit (D-Shape)

The dimensions of the PURE-D are the same as the dimensions of a regular toilet seat. This made the PURE-D suitable for almost every toilet with a D-Shape. If you want to be sure that the PURE-D fits on your toilet, order the free fit tool at www.denck.eu/fittool.

Integrated Battery Pack

The PURE-D features a rechargeable and interchangeable Battery Pack that lasts up to about 20 days⁽¹⁾ per charge cycle. The Battery Pack ensures that the PURE-D can be installed anywhere because you don't need an outlet in your toilet or bathroom. When the Battery Pack is empty, you can just take it out and charge it with the included micro-USB-cable.

Automatic start-stop

A smart sensor knows when someone is sitting on the toilet and turns on the PURE-D automatically. When there's no one sitting on the toilet, the PURE-D will continue ventilating for a short period of time and will automatically turn off right after.

No chemicals

Due to the optimal airflow combined with a carbon filter, the elimination of unpleasant odors can be done completely without chemicals or other harmful substances. This way it's not only safe for yourself, but also for the environment.

Easy to install and maintain

The PURE-D toilet seat is easy to install without any special tools. The Quick Release hinge system is suited for almost every toilet with a D-Shape and ensures that the toilet seat can be easily removed and clicked back in. You can maintain the PURE-D exactly like you would maintain an ordinary toilet seat. If you want to clean it thoroughly, you can use the optional cleaning set.

Soft Close & Quick Release

The in-house developed Soft Close hinge system makes sure that the PURE-D always closes gently, silently and safely. With the Quick Release function you can remove the PURE-D from the toilet in 1 action easily to clean the toilet and the PURE-D.

Durable, antibacterial and scratch-free

The PURE-D is made from Duroplast, a practically unbreakable and light type of plastic. The PURE-D is also more hygienic, very user-friendly and scratch-free due to the extra smooth surface and the pore-free Duroplast material.

Replaceable filter

Thanks to the integrated filter, you can be sure of an optimally functioning system for at least 6 months(1). If your filter saturated, you can order more filters from us. You can easily replace the filter and it's also biodegradable.

Easy to install

1. Check the fit

Use the included fit tool to check if the PURE-D fits your toilet. Position the fit tool so that it fits at the front of your toilet and that it's in the middle on the left and right side. You should be able to see the mounting holes of your toilet in the recesses provided for this in the fit tool.

3. Position the hinge system

Place the fit tool with the provided holes over the pins of the hinge feet. Position the fit tool so that it fits perfectly at the front of your toilet and so it's in the middle on the left and right side. Tighten the screws firmly to fix the hinge feet and remove the fitting tool. Place the covers of the hinge feet for protection.

4. Install the PURE-D toilet seat

Thanks to the Quick Release system, you only need to click the toilet seat onto the hinge system. If you want, you can remove the toilet seat by opening the PURE-D and pulling it up.

2. Attach the hinge system

Push the mounting plugs into the mounting holes until the collar fits the toilet. Place the hinge feet and screw the screw into the mounting plugs. Do not fully tighten the screws yet so you can still move the hinge feet.

Charging the Battery Pack

Charging or changing the Battery Pack of the PURE-D is very easy. When you remove the magnetic cover from the lid, you can click the Battery Pack out. You can use the Micro-USB-cable to charge the battery.

Take the magnetic cover off the lid and place it in the hole of the toilet.

Replacing the filter

Is your filter saturated? Remove the magnetic cover from the lid and open the filter cover. Now you can remove the old filter and replace it with a new filter easily. The filter contains a soft rubber all around so your hands won't get dirty.

Take the magnetic cover off the lid and place it in the hole of the toilet.

Pull the tab on the Battery Pack down to release the Battery Pack. Then pull the USB-C-cable out of the Battery Pack and charge it with the included Micro-USB-cable.

Pull the tab on the filter cover to the left to release and remove the filter.

Frequently Asked Questions

What material is the PURE-D made of?

PURE-D is made of high-quality Duroplast. Duroplast is a material that is known for its strength and high heat resistance. Duroplast is also scratch-free, hygienic and easy to maintain.

Will the PURE-D fit my toilet?

The first version of the PURE-D has been developed with a D-shape. This is the most common for modern wall-hung toilets. Do you want to be sure that the PURE-D fits your toilet? Request our free fit tool and try it at home or in the shop.

Can I install the PURE-D myself?

The installation of the PURE-D is just as easy as the installation of a regular toilet seat. You just need to mount the Soft Close hinges to your toilet bowl and click the PURE-D through the Quick Release function of the product.

Do I need a power supply?

No. The PURE-D already comes with a 20.000mAh strong Power Bank that you can recharge whenever it's dead. There is of course also a version for 110-240V available if you have a power supply nearby.

Do I need water supply?

No. The PURE-D mainly focuses on the odor extraction and therefore doesn't contain a bidet function, meaning there is no water supply required.

Can the filter be replaced?

Yes, you can easily replace the filter yourself. We provide ready-to-use filter cassettes that you can just click into the toilet seat.

How often should the filter be replaced?

The filter lasts a long time, but how long exactly depends on the use. In a family situation of 2 adults and 2 children, the filter should be replaced once every 6 to 9 months.
